# Deltapath Meeting Cloud
## Video Meeting Cloud With Maximum Security

Many organizations are embarking on a digital transformation journey that promises to deliver new and enhanced ways to collaborate and communicate. This movement is also powering cloud adoption as many organizations believe it is a necessary journey that will impact their success, give them a competitive edge over their competitors, and get them closer to their goal of becoming a truly digital organization.  At Deltapath, we help organizations of all sizes strategically and positively impact their digital transformation with our cloud solutions.

## What is it?

Deltapath Meeting Cloud is a highly secured cloud-based video conferencing service where  all communication data is transmitted and stored within your network, allowing you to effortlessly comply with regulatory requirements while enjoying all the bells and whistles offered by public video cloud providers.

## How does it work?

The meeting and collaboration solution allow organizations to privately host on their own network. With interoperability being part of Deltapath's DNA, we also give users the choice to use their favorite device to join a meeting, including Cisco, Avaya, Poly/Polycom, Lifesize, legacy H.323, laptop, or mobile device.
Install a virtual instance on your network to host and attend video conferences with the highest degree of security and encryption. External meeting participants can join your meetings using a one-time meeting code that is unique for each participant and not reusable.

Build multiple instances across your network in different geographical locations and offer your organization auto-failover and auto-redirect capabilities to the server closest to your users, reducing latency and bandwidth utilization across transpacific/transatlantic links.

Record meetings with confidence. Files are stored on your network in encrypted data storage. No data is ever harvested or sold. You have absolute data sovereignty.

## What are the benefits?

Users experience different connection qualities to the Internet depending on their geographical location. The Internet provides only best-effort data transmission subject to bandwidth, packet loss, and latency. As a result, organizations often subscribe to private leased circuits or MPLS circuits to create their own private network within their organization. In this type of setup, routing video meetings to the public Internet would defeat the investment of private circuits, which has guaranteed quality of connection. In addition, routing sensitive meeting information to the public Internet can pose additional security risks and compliance concerns even when the information is encrypted.

# CONNECT TO YOUR NEXT VIDEO CONFERENCE HOWEVER YOU WANT

### Cisco, Avaya, Poly/Polycom, Lifesize, Legacy H.323, Laptop, or a Mobile Device

# Deltapath Meeting Cloud

## Essential Features

✓ Open standard SIP video conferencing room systems

✓ H.323 video conferencing room systems

✓ Join meeting with a web browser (WebRTC)

✓ Deltapath Meeting app for Windows & Mac

✓ Audio dial-in with Dolby noise cancellation technology

✓ Lock and unlock conference

✓ Content sharing

✓ Host password

✓ Guest password

✓ One-time guest access

## Supercharge With Booster Features

• Webinar town-hall

• Video recording

# Discover Why Deltapath Is a Trusted Cloud Service Provider

## Readiness

Deltapath's proprietary technology is built from the ground up. That means we own the technology and we always have access to it. Our technology, which focuses on innovation, need, viability, and optimization has been maturing for over a decade. As a result, our technology is optimized for the cloud and optimized to operate over the public internet to help you implement, manage and support your communication needs.

## All-In-One Solution

Deltapath offers an all in one solution, which helps create simplicity by minimizing the need for multiple providers and experts to support the vision and goals of your company.

## Scale

We allow you to grow at your own pace and can accommodate fluctuations in your business. Compute and storage capacity are available anytime with our on-demand model so we are always ready for your ideas – big or small.

## Flexibility

Operational flexibility gives you more say on the software version you are running, configuration options, and scheduling upgrades so you can remain in compliance with your change management rules, guidelines set out by ISO, and other rules and regulations.

## Availability and Monitoring

Our team is situated in the northern and eastern hemispheres, which allows Deltapath to monitor servers around the clock to provide you with 99.999% availability. Our cloud infrastructure is hosted in multiple continents connected via a premium network backbone.

## What Cloud Fits?

Deltapath's cloud solution can be privately hosted on your network so you are in full control. It is an ideal solution for organizations that do not have internet due to security risks, and those organizations that must remain compliant with laws and industry regulations that prevent them from moving data offsite. On-the-other-hand, organizations can choose to outsource their entire IT management needs and have all their cloud service needs provided by Deltapath.

## Reduce and Simplify

Harnessing our cloud solution will reduce your infrastructure costs and simplify management so you can redirect your funds and resources towards transforming your business and staying competitive.

## Data Sovereignty

Deltapath Cloud isolates your data to minimize security risks. There is no co-mingling of data because the database is never shared. This makes our cloud solutions ideal for organizations that must conform to data isolation requirements such as financial, healthcare, and government institutions.

## Quality

If you operate your network with MPLS or private leased circuits, you can benefit from our privately hosted cloud where all traffic flows within your network with minimal latency and service level guarantee resulting in better transmission speed of text, and better audio and video quality.

## Security

Privacy and Security are core business issues. Deltapath has designed, built and maintained a very secure UC solution with many layers of defense. Read our Privacy and Security brochure to discover the steps we take to protect you.

---

## About Deltapath

Deltapath liberates organizations from the barriers that prevent effective communication and revolutionizes the way organizations communicate through innovative technologies that meet the needs and the wants of organizations.

We specialize in solutions that unite different communication platforms, audio and video equipment, telephones, desktops, and mobile devices to make communication accessible and intuitive.

It is our belief that every solution should embody simplicity and offer users the right form of communication for the right occasion, right at their fingertips.
